

Homey Pro Specifications Sheet

- **Eight Smart Home Technologies:** **Wi-Fi** (2.4GHz & 5GHz), **Bluetooth Low Energy 5.0 (BLE)**, **Zigbee 3.0**, **Z-Wave (Plus, S2)**, **433MHz RF**, **Infrared**, **Matter** (the new smart home language backed by large brands including Apple, Amazon, Google and IKEA), and **Thread** to connect with smart home devices in a single hub.
 - Homey Pro automatically switches its Z-Wave frequency with a unique multi-antenna design, based on Homey Pro's geographical or country location.
 - 433MHz RF is currently activated in Europe, Asia and Oceania.
 - In addition to generic Matter support, Homey Apps can extend Matter devices' functionality with manufacturer-specific features, energy usage and a manufacturer-defined appearance to honor the brand's uniqueness.
- **Supported Devices:** 50,000+ smart devices from more than 1,000 brands
- **Control Options:**
 - **Smartphone or Tablet:** iOS (v11 or higher) and Android (5.0 or higher)
 - **PC, Mac, Linux:** Universal web app including Homey Flow, Homey Insights and Advanced Flow
 - **Voice Assistants:** Google Assistant, Amazon Alexa, Siri Shortcuts, Homekit (Experimental)
 - **Other:** Apple Watch, iOS and Android widgets, inputs from physical smart devices through Homey Flow automations.
- **Wired Networks:** In addition to Wi-Fi, Homey Pro can be connected to a wired network with the optional Homey Pro Ethernet Adapter (MSRP \$29). Designed to be plugged into the power adapter, Homey Pro looks beautiful without messy cables, even when connected to ethernet.
- **Local Processing:** Homey Pro processes and stores everything locally, independent of an internet connection. No subscription is required. It can be connected to local LAN instead of Wi-Fi through the optional Homey Pro Ethernet Adapter.
- **Personal Data Processing:** Local. No profiling or other privacy-invading uses.

- **Satellite Mode:** Homey Pro can be extended with one or more [Homey Bridge](#) devices to increase wireless coverage in large homes. Zigbee and Z-Wave act as powered repeaters in the mesh network. Devices that use Infrared or 433 MHz will use the nearest Homey Pro or Homey Bridge.
- **Back-up Options:** Homey Pro has a free local back-up option via PC or Mac. Cloud backups are also available through an optional 99 cents per month subscription.
- **Homey Cloud Services:** such as the [Homey App Store](#) and remote access — are included free of charge with the new Homey Pro, as is the Advanced Flow automation editor.
 - New devices and services are added daily to the Homey App Store, which allows developers and manufacturers to extend support to more devices and services, all free to end-users.
 - The Homey App Store features more than 750 apps, including staff picks and popular apps that can be browsed by category.
- **Where to Buy:** Available for order at Amazon or the [Homey website](#)
- **Price:** \$399 (US) / €399 (EU) / £399 (UK) / \$549 CAD (Canada)
- **What's in the Box:** Homey Pro, USB-C power adapter, USB-C to USB-C power cable and a Quick Start Guide
- **Hardware Specifications:** 1.8GHz ARMv8 Quad Core, 2GB RDDR4AM, 8 GB onboard storage
- **Device Dimensions:** 5.04" inches in diameter x 1.5" inches in height
- **SKU / EAN:** HOMEY-PRO-US-03 / 8719327704318
- **Weight:** 0.66 lbs (device only) / 1.3 lbs (including packaging)
- **Manufacturer Warranty:** Two-years
- **Certifications:** FCC and CE
