

# Direct to Satellite Massive IoT

## EchoStar Mobile LoRa<sup>®</sup> enabled Non Terrestrial Network

Our network enhances the power of LoRaWAN<sup>®</sup>, leveraging licensed S-Band satellite to offer real-time, bi-directional IoT data transfer to and from any battery-operated things across Europe and the United States without any additional infrastructure.

With EchoStar Mobile reliable and efficient direct-to-device Satellite IoT, the sensors can collect, process, and transmit data, enabling organisations across a wide range of industries to optimise their operations, improve efficiency, reduce waste and control costs.
